Industry Projects

Crazy Hub: This website, made using **React.js**, is an e-commerce platform specializing in electronics products such as mobile phones, laptops, and their accessories, offering an online shopping experience.

Project URL: <https://crazyhub.com>

Aara Enterprises: This project, built with React.js, serves as a comprehensive management system designed to streamline various aspects of the business, including **Inventory Management, Sales Management, Purchase Management, Support Management, CRM** and **HRM**. With Aara Enterprises, we have created a powerful tool to enhance the overall operations and customer experience for our store.

Project URL: <https://erpb2.bhaaraterp.com>

Technology used in all above projects.

HTML, CSS, React JS, Redux, Tailwind CSS, Bootstrap, Material UI, Material Joy UI, Ant design, Lighthouse for performance.

My roles and responsibilities

- Develop and maintain interactive and responsive user interfaces for web applications using React.js.
- Collaborate closely with the design and back-end teams to translate wireframes and mock-ups into pixel-perfect UI components.
- Implement state management using Redux, ensuring efficient data flow and consistent application behavior.
- Successfully integrated third-party APIs like Google Map and RazorPay Payment Gateway Integration into React.js applications.
- Actively participate in code reviews, providing feedback and suggestions to improve code quality, maintainability, and adherence to best practices.
- Stay updated with the latest ReactJs trends and advancements, experimenting with new features and techniques to enhance development processes.
- Key Skills: HTML, CSS, React JS, Redux, Tailwind CSS, Bootstrap, Material UI, Material Joy UI, Ant design, UI/UX Design, Git.

Hobbies:

- Reading Books
- Playing Video Games
